MORE POTTERY MADE

Value of Production and Imports in
1912 Exceeds \$46,000,000.

People are using and breaking more
cups and saucers than ever before. Last
year according to figures compiled by
Jefferson Middleton of the United States
geological survey, pottery to the value
of \$46,059,694 was consumed in the
United States. Of this sum the do-
mestic product was valued at \$36,504,164
and the imported product at \$9,555,530.
The output of pottery for the United
States in 1912 showed an increase in
value of \$1,985,604 over that for 1911.
Every product except stoneware and
yellow and Rockingham were particu-
lars in the increase. The variety
showing the largest absolute gain was
sanitary ware, which increased \$870,797,
and the largest proportional gain was in
porcelain electrical supplies, which in-
creased \$95,215. The value of white
ware, including china but excluding
sanitary ware and porcelain electrical
supplies, was \$17,006,736 in 1912, com-
pared with \$16,424,236 in 1911. China
ware showed an increase of \$119,320, the
value reported for 1912 being the highest
ever recorded.

Ohio continued to be the leading pot-
tery-producing state in the union, re-
porting wares valued at \$15,508,735, or
\$2.49 per cent of the total, an increase
of \$733,470. Ohio's principal pottery
product is white ware, which represents
general household wares. New Jersey
was the second largest pottery produc-
ing state, the value of its product in
1912 being \$8,935,920, an increase of
\$333,979. The principal pottery product
of the state is sanitary ware. West
Virginia was third in 1912, with wares
valued at \$3,365,169, or \$484,994 more
than the value of the output in 1911.
New York, Pennsylvania, Indiana, and
Illinois were fourth, fifth, sixth and
seventh, respectively, in the value of
output in 1912.

According to Mr. Middleton's report,
which has been issued as an advance
chapter from "Mineral Resources" for
1912, the pottery industry was in a
high state of development during the
year and the value of the pottery pro-
ducts marketed was the largest in the
history of the industry. This was due
partly to the general prosperity en-
joyed by the country at large, but more
especially to the steady improvement in
the wares themselves in body, design,
and decoration. American pottery is
gaining a stronger hold on the market,
becoming more popular every year.
Many of the most of the best hotels and
clubs in the country are now using
large quantities of domestic china.

free on application to the director, U. S.
geological survey, Washington, D. C.

resigned. The matter of closing stores
